Company Overview

Apex Enterprise Solutions (AES) is a C-Corporation headquartered in Sunnyvale, California, delivering mission-critical infrastructure deployment services across the United States and Canada. We specialize in structured cabling, data center rack-and-stack, and large-scale wireless access point rollouts — serving primes, integrators, and enterprise IT teams who need a reliable, field-first execution partner.

AES operates as a trusted subcontract execution partner, bringing disciplined field processes, experienced technicians, and clean closeout documentation to every engagement. We mobilize rapidly across North America, with active field pods in California, Texas, Nevada, and Tennessee.

Racks Built & Validated	Fiber Pulled & Certified	WAPs Installed	AI/ML Pods Delivered

Core Services

Structured Cabling — Copper & Fiber

Certified copper and fiber that pass the test the first time, from IDF/MDF rooms to hyperscale halls.

- CAT6/6A copper runs and terminations
- SM/MM fiber pulls, LC/MPO terminations, and fusion splicing
- OTDR and power meter certification; labeling to TIA/EIA-606
- Rack dressing, pathway design, and permitting support
- Freezer/cooler and high-bay rated installations
- Certification reports, label schema, as-builts, and closeout pack

OTDR Pass Rate ≥ 99%	TIA/EIA-606 Compliant	Zero-Incident Target

Rack & Stack — Data Center Build & Refresh

From bare room to live racks — fast. Disciplined execution from pre-build planning through validated handover.

- Pre-build planning: rack layout, power mapping, cable management design
- Physical rack installation, anchoring, and leveling
- Server, switch, and appliance mounting per vendor standards
- PDU installation, circuit labeling, and cable management
- BIOS/firmware validation, burn-in support, and asset tagging
- CMDB population, rack diagrams, and full closeout documentation

Zero-Defect Validation Target	CMDB-Ready at Handover	72hr Burn-In Available

AP Refresh — Large-Scale Wireless Rollouts

High-density Wi-Fi that survives steel, concrete, and cold storage. Multi-site rollouts with a standardized deployment playbook.

- Predictive and on-site RF surveys and coverage planning
- AP physical installation — ceiling, wall, and high-bay mounting
- Low-voltage cabling and conduit runs to AP locations
- Controller and cloud-managed AP configuration and onboarding
- Post-install RF validation, heatmaps, and coverage testing
- Multi-site program rollouts with standardized deployment playbooks

≥95% First-Pass Coverage	98% Installation Rate	Validated Test Pack

Why Partners Choose AES

Execution Partner, Not a Vendor
We operate as an extension of our partners' field teams — responsive, accountable, and focused on protecting schedule and quality.

Field-First Culture
Technicians focused on clean installs, proper labeling, validated testing, and closeout documentation that holds up.

Rapid Mobilization
Active field pods across the U.S. and Canada. We scale up quickly for multi-site and urgent deployment programs.

Clean Closeout Documentation
Every project ends with as-builts, test reports, and label schemas — reducing rework and protecting our partners.

Certified & Compliant
Technicians hold BICSI, CompTIA, and vendor-specific certifications. Full adherence to TIA/EIA-606 and OSHA standards.

Lean & Competitive
A lean delivery model keeps overhead low without sacrificing quality — enabling competitive pricing on every engagement.

Past Performance

AI Cluster Pod Build

■ Tennessee

Delivered a high-density AI data center buildout for a confidential hyperscale client utilizing NVIDIA H200 GPUs on Supermicro liquid-cooled platforms.

48 racks built & validated
192 × 400G links installed
72-hour burn-in with zero punch items at handover

Large-Scale Warehouse AP Refresh

■ Toronto, ON & Las Vegas, NV

Enterprise-scale wireless AP refresh across multiple high-throughput distribution centers, including freezer and cooler-rated installations.

1,200 WAPs installed
≥95% coverage achieved first-pass
Zero unplanned downtime

Amazon Warehouse — AP Refresh & Low Voltage

■ United States

Multi-site wireless rollout and low-voltage cabling for Amazon fulfillment centers, executed to a standardized deployment playbook.

850 APs installed
98% first-pass installation rate
On-schedule delivery across all sites

Telecommunications Lab Build-Out

■ Georgia

Full lab installation, structured cabling, commissioning, and comprehensive handover documentation for a telecom infrastructure client.

Full scope from survey to handover
Complete as-built documentation delivered
On-time, on-budget execution

Company Data

Company Name	Apex Enterprise Solutions, Inc.
Business Type	C-Corporation
Headquarters	1069 Duane Ct., Sunnyvale, CA 94085
Service Area	United States & Canada
DUNS Number	118963822
EIN	88-2265606
NAICS Codes	238210 – Electrical Contractors & Wiring Installation 541512 – Computer Systems Design Services 541519 – Other Computer Related Services

Key Personnel

Saad Usmani
Chief Executive Officer

Leads AES business development, partner relationships, pricing, and delivery oversight across all operations. Holds a Master's degree from Toronto Metropolitan University with deep experience in data center and network infrastructure deployment across the U.S. and Canada.

Vinod Bharwani
Chief Operating Officer

Oversees infrastructure deployment operations, execution planning, and field delivery coordination. Brings a track record of successful project collaborations with major industry players including AT&T;, Vodafone, and Reliance.

Raheel Bodla
Business Advisor

Silicon Valley-based operational leader and business coach with experience scaling technology companies from multi-million to tens-of-millions in revenue. Provides strategic guidance on AES growth and business development.

Certifications & Compliance

- BICSI-trained technicians for structured cabling and data center infrastructure
- TIA/EIA-606 labeling and documentation compliance on all cabling projects
- OSHA safety standards adherence on all field engagements
- National Electrical Code (NEC) compliance
- Vendor certifications: CompTIA, Cisco, VMware
- Client-specific security and compliance requirements met on request
