

CAPABILITY STATEMENT

INFRASTRUCTURE. DEPLOYMENT. PERFORMANCE.

COMPANY OVERVIEW

Apex Enterprise Solutions (AES) is a C-Corporation headquartered in Sunnyvale, California, delivering infrastructure deployment services across the United States and Canada. We specialize in structured cabling, data center rack-and-stack, and large-scale wireless access point rollouts — serving primes, integrators, and enterprise IT teams who need a reliable, field-first execution partner.

AES operates as a trusted subcontract execution partner, bringing disciplined field processes, experienced technicians, and clean closeout documentation to every engagement. We mobilize rapidly across North America, with active field pods in California, Texas, Nevada, and Tennessee.

CORE SERVICES

Structured Cabling — Copper & Fiber

Certified copper and fiber that pass the test the first time, from IDF/MDF rooms to hyperscale halls.

- CAT6/6A copper runs and terminations
- SM/MM fiber pulls, LC/MPO terminations, and fusion splicing
- OTDR and power meter certification; labeling to TIA/EIA-606
- Rack dressing, pathway design, and permitting support
- Freezer/cooler and high-bay rated installations
- Certification reports, label schema, as-builts, and

OTDR-Certified Every Run	TIA/EIA-606 Compliant	Zero-Incident Target closeout package	SHA adherence on-site
--------------------------	-----------------------	---------------------------------------	-----------------------

Rack & Stack — Data Center Build & Refresh

From bare room to live racks — disciplined execution from pre-build planning through validated handover.

- Pre-build planning: rack layout, power mapping, cable management design
- Physical rack installation, anchoring, and leveling
- Server, switch, and appliance mounting per vendor standards
- PDU installation, circuit labeling, and cable management
- BIOS/firmware validation, burn-in support, and asset tagging

Punch-List Cleared Before Handover	CMDB-Ready At Handover	72hr Burn-In Available	CMDB population, rack diagrams, and full closeout documentation
------------------------------------	------------------------	------------------------	---

AP Refresh — Large-Scale Wireless Rollouts

High-density Wi-Fi that survives steel, concrete, and cold storage. Multi-site rollouts with a standardized deployment playbook.

- Site surveys and RF coverage planning
- AP physical installation — ceiling, wall, and high-bay mounting
- Low-voltage cabling and conduit runs to AP locations
- Controller and cloud-managed AP configuration and onboarding
- Post-install RF validation and coverage testing
- Multi-site program rollouts with standardized

Per-AP Progress Tracked in Real Time	RF Validated Post-Install	Validated Test Pack At Handover	Deployment playbooks No chasing required
--------------------------------------	---------------------------	---------------------------------	---

WHY PARTNERS CHOOSE AES

Execution Partner, Not a Vendor

We operate as an extension of our partners' field teams — responsive, accountable, and focused on protecting schedule and quality.

Rapid Mobilization

Active field pods across the U.S. and Canada. We scale up quickly for multi-site and urgent deployment programs.

Certified & Compliant

BICSI-trained technicians. Full adherence to TIA/EIA-606, OSHA, and client-specific compliance requirements.

Field-First Culture

Technicians focused on clean installs, proper labeling, validated testing, and closeout documentation that holds up.

Clean Closeout Documentation

Every project ends with as-builts, test reports, and label schemas — reducing rework and protecting our partners.

Lean & Competitive

A lean delivery model keeps overhead low without sacrificing quality — enabling competitive pricing on every engagement.

I built AES because the market had a real shortage of execution partners who actually cared about the standard of work — not just getting the job done fast.

Saad Usmani — Founder & CEO, Apex Enterprise Solutions

PAST PERFORMANCE

Tennessee, USA

AI Cluster Pod Build

High-density data center buildout for a confidential hyperscale client utilizing NVIDIA H200 GPUs on Supermicro liquid-cooled platforms.

- 48 racks built & validated
- 192 × 400G links installed
- 72-hour burn-in completed at handover

United States

Amazon Fulfillment — AP Refresh

Multi-site wireless rollout for Amazon fulfillment centres, executed to a standardized deployment playbook with structured shift hand-offs and real-time progress tracking.

- 850 APs installed & validated
- On-schedule delivery across all sites
- Zero safety incidents recorded

Ontario, Canada (Scarborough & Bolton)

Large-Scale Warehouse AP Refresh

Enterprise-scale wireless AP refresh across two high-throughput fulfillment centres (YYZ9 and YYZ7), including high-bay and mezzanine-level installations.

- 1,586+ APs installed across both sites
- 24-hour window met at YYZ9
- Zero safety incidents recorded

United States

Telecom Transport Lab Build-Out

Full lab installation, structured cabling, commissioning of DWDM/MPLS/microwave platforms, and comprehensive handover documentation for a major U.S. energy provider.

- 6 racks commissioned across 4 platforms
- Full as-built documentation delivered
- On-time, on-budget — 2-week window met

COMPANY DATA

Company Name	Apex Enterprise Solutions, Inc.
Business Type	C-Corporation
Headquarters	1069 Duane Ct., Sunnyvale, CA 94085
Service Area	United States & Canada
DUNS Number	118963822
EIN	88-2265606
NAICS Codes	238210 – Electrical Contractors & Wiring Installation 541512 – Computer Systems Design Services 541519 – Other Computer Related Services

KEY PERSONNEL

Saad Usmani

Chief Executive Officer

Leads AES business development, partner relationships, pricing, and delivery oversight across all operations. Saad founded AES after a decade in telecom and systems engineering, where he identified a consistent gap in reliable field execution partners for large-scale infrastructure programs. Holds a Master's degree from Toronto Metropolitan University with deep experience in data center and network infrastructure deployment across the U.S. and Canada.

Raheel Bodla

Business Advisor

Silicon Valley-based operational leader and business coach with experience scaling technology companies from multi-million to tens-of-millions in revenue. Provides strategic guidance on AES growth and business development.

CERTIFICATIONS & COMPLIANCE

- BICSI-trained technicians for structured cabling and data center infrastructure
- TIA/EIA-606 labeling and documentation compliance on all cabling projects
- OSHA safety standards adherence on all field engagements
- National Electrical Code (NEC) compliance
- Vendor certifications: CompTIA, Cisco
- Client-specific security and compliance requirements met on request
